Transcript: Fiducial Pk-Ratio Prediction on the Full Emulator k-Grid

HEP-Genesis-Agent session record
Project: expert-schneider15-cl-bias

2026-10-25

The conversation verbatim, generated mechanically from the session record.

A Conversation transcript

The exchange verbatim (assistant text as shown to the user; tool calls summarized by name — see the tool-call log for arguments and results).

User (2026-10-25 16:24:05)

Using predict_observable, predict Pk-ratio at the emulator's FIDUCIAL design point (use describe_parameters to confirm the exact fiducial omega_m and sigma_8, and use midpoint values for the 5 subgrid AGN/kinetic-feedback parameters kappa_w, e_w, M_seed, v_kin, epsilon_kin unless describe_parameters documents a literature-calibrated fiducial for them) at redshift z=0.5 on the full k-grid. Report back the output CSV file path. Do not round numbers; give me the raw path so I read the full table myself.

Assistant (quick mode, 2026-10-25 16:24:05)

Run error: Interrupted: the run stopped before it finished; the text and tool calls are what it did up to then.

User (2026-10-25 16:24:32)

Using predict_observable, predict Pk-ratio at the emulator's FIDUCIAL design point (use describe_parameters to confirm the exact fiducial omega_m and sigma_8, and use midpoint values for the 5 subgrid AGN/kinetic-feedback parameters kappa_w, e_w, M_seed, v_kin, epsilon_kin unless describe_parameters documents a literature-calibrated fiducial for them) at redshift z=0.5 on the full k-grid. Report back the output CSV file path. Do not round numbers; give me the raw path so I read the full table myself.

Assistant (quick mode, 2026-10-25 16:24:32)

Tool calls: `describe_parameters`, `describe_parameters`, `predict_observable`

The fiducial-design-point values were confirmed as $\omega_m = 0.143$ and $\sigma_8 = 0.82$. Midpoint subgrid values were used: $\kappa_w = 3.0$, $e_w = 0.6$, $M_{\rm seed} = 1.3$, $v_{\rm kin} = 0.65$, and $\epsilon_{\rm kin} = 0.61$.

At $z = 0.5$, the full 799-bin k-grid CSV is:
